# BASIC FIREARMS COURSE

## What it it?

NWTGR specializes in providing expert firearms training services to civilians, government entities, and private sectors. Our training programs are customized to cater to individuals at various skill levels, ranging from fundamental firearms handling to advanced tier 1 training and tactics. Distinguishing ourselves, we are the sole UK-based company offering section 5 firearms training to the public, going beyond the conventional UK .22 rimfire experience.

Our **Basic Firearms Course** is designed for all levels of experience into section 5 firearms. Students will be provided a Semi automatic .223 / 5.56 caliber AR15 platform carbine rifle and a 9mm semi auto pistol. On our BFC you will learn the skills and knowledge to fire, maintain, resolve failures and handle ammunition. Students will learn about range rules, etiquette, different firearms and most of all **SAFETY**.

## WHOS IT FOR?

The NWTGR basic firearms course accommodates individuals from diverse backgrounds. Our students include teachers, nurses, police officers, enthusiasts, sports enthusiasts, security personnel, close protection professionals, and more. As a highly inclusive company, we prioritize creating a welcoming environment, ensuring every student feels embraced and valued.

**“We ensure all students are fully aware of not only the how - but the why”**

We aim to bring all like minded individuals and organisations together, regardless of vocation, in an effort to bridge the gaps and create a cohesive community of safe and effective professionals

# LOCATION & ACCOMODATION

In adherence to UK firearms laws, limitations are imposed, restricting the use of most semi-automatic firearms to .22 rimfire caliber. However, our live firing range is situated in Modlin, Poland, enabling us to provide customers with the opportunity to utilize various calibers, including fully automatic firearms.

**Our Range, Hotel and airport are all within 5 miles on each other.**

We want our students to experience **REAL, FULL CALIBER** firearms such as 556 carbines, 9mm pistols and 7.62 ak47's to fully respect the skill required to be safe and competent.

# BENEFITS

## SAFETY

Everyone can benefit from firearms instruction. Knowing firearm safety rules and proper handling reduces the risk of a negligent discharge or improper handling of firearms. Training is undoubtedly beneficial for those handling firearms, even if they don't plan to use them regularly.

## Accuracy

Our firearms instructors will greatly improve your accuracy. Learning about proper grip, stance and trigger pull will help make considerable progress on your skill level. Accuracy helps prevent miscalculated shooting, which in turn helps against accidents.

## Confidence & Competence

Knowing more about firearms and their effective use will naturally build confidence. The more training you have, the more confidence you will have. But without competence, your confidence will cause a negligent accident and potentially hurt someone not intended. We aim to build both confidence AND competence.

## Tactical Mindset (more for military, police and security personnel)

The skills needed for effective use of a firearm go far beyond target shooting. They include critical thinking, staying calm under pressure and the ability to know when to shoot and when to refrain. Without fully understanding the complexity of the situations you can find yourself in, you may be more likely to make a bad decision, and reality-based training will prevent you from falling back on an unplanned response.

**With our company you will not be disappointed!!**

# Price & Payment Options

All our courses are an all inclusive

## £1145 one time payment

DEPOSITS OF £140 CAN BE TAKEN

(BALANCE MUST BE PAID 10 DAYS PRIOR TO START DATE)
